INDEX
FEATURES IN VOLUME 2 (14 JAN '71—9 DEC '71)
ENGINEERING PRODUCTION

ADHESIVES
Coated steels lead to better product. 11-25 FEB, p 203
Resin bonding. 9 DEC, p 3

AUTOMATIC ASSEMBLY
Automated assembly line for Fiat. 6 MAY, p 29
Cap threading bridges the automation gap. 11-25 MAR, p 15
Dual duty conveyors boost car transmission assembly. 8 JULY, p 35
Lamp assembly fully automatic. 9 DEC, p 3
Modular systems make auto assembly pay
By Julian Moore. 24 JUNE, p 17
What's best D-I-Y or outside specialists? 11-25 FEB, p 213

AUTOMATION
Add-on extras boost productivity. 20 MAY, p 48
Add-on extras can boost machine productivity. 8 APR, p 17
Auto handling ups lathe output. 22 JULY, p19
Automatic multi-pass copying. 9 SEPT, p 39
Automation—the role of DRO on centre lathes
By Julian Moore. 19 AUG, p 17
Conference looks at on-line inspection. 19 AUG, p 29
Control systems—what is their scope?
By Arnold Searle. 20 MAY, p 17
Controller incorporates mini-computer. 18 NOV, p 51
Fluidics quadruples production. 7 OCT, p 41
Foundry installs auto-line. 10 JUNE, p 28
How to be small and successful. 7 OCT, p 29
Inspection machines—what do they offer? 7 OCT, p 17
Low cost position controller. 24 JUNE p 35
Low cost positioning. 8 JULY, p 39
New style conveyor system—by compressed air. 19 AUG, p 38
Precision auto loading. 7 OCT, p 37
Robot feeds internal grinder. 21 SEPT, p 38
Seen at the 1971 Foundry Exhibition
By George Lewis. 8 JULY, p 21
Survey shows bar feeders lift output by 50 per cent. 8 APR, p 25
Ultrasonics automated. 18 NOV, p 61
Versatile rocker arm machining. 21 SEPT, p 41
What's best—D-I-Y or outside specialists? 11-25 FEB, p 213

BRAZING & SOLDERING
An exercise in soldering stainless steels
By R A Kelly. 11-25 FEB, p 179
Can BABS help you? 20 MAY, p 4

BROACHING
Surface broaching improves finish. 20 MAY, p 47

CASTING
Castings drilled easier. 11-25 FEB, p 176
Magnetic "sand" simplifies casting. 18 NOV, p 57
The economics of investment castings
By Peter Jackson—P I Castings (Altrincham) Ltd. 21 SEPT, p 31

CERAMICS
Ceramic tools—where do they stand today?
By Eric Holt, Maxicarb Hard Metals. 10 JUNE, p 9
Diamond grinding of ceramics. 7 OCT, p 4

CLEANING
Billet cleaning raises extrusion quality. 4 NOV, p 42
Clean components can cut costs. 11-25 FEB, p 171
Degreasing made safer and cheaper. 7 OCT, p 39
Do you need a clean room? 22 APR, p 19
By Ray Scott
Ultrasonic degreasing system. 21 SEPT, p 39
Ultrasonics tests hot steel plates . . . cleans valve parts. 24 JUNE, p 36-37
Washing plants installed for oil and fuel tanks. 21 SEPT, p 46

COATING
Coated steels lead to better products. 11-25 FEB, p 203
Detonation coatings increase wear resistance. 14 JAN, p 25
Hot spray coating offers production advantages
By Tony Philpott. 23 SEPT, p 9
Printed gaskets eliminate 'O' ring grooves. 21 OCT, p 37
Working with vinyl-metal
By P L Furminger, Research & Development Manager, Huntley, Boorne & Stevens Ltd. 11-25 MAR, p 35

COMPUTERS & PROGRAMS
Breakthrough leads to battery computers. 21 OCT, p 40
Computer aids production. 9 SEPT, p 38
Controller incorporates mini-computer. 18 NOV, p 51
Language managers understand. 10 JUNE, p 2
Lathe program. 10 JUNE, p 2
Service finds capacity. 9 DEC, p 5
Useful techniques from the MCFM01 post processor
By J Robinson, Computer Systems Designer. 11-25 FEB, p 167
What's new in shop floor computers?
By Andrew Kirk, Director of Computers in Commerce Group Ltd. 24 JUNE, p 23

CONTROL SYSTEMS
Eyecatchers in Milan—seen at EEMU 12. 4 NOV, p 11
Just dial in the dimension. 18 NOV, p 5

CUTTING FLUIDS
Cutting fluids—their function and selection
By T A Stoddart, CEng, FIProdE. 21 SEPT, p 25
Wages systems in welding. 11-25 MAR, p 12

CUTTING TOOLS
Bi-metal bandsaws. 18 NOV, p 2
Ceramic tools—where do they stand today?
By Eric Holt, Maxicarb Hard Metals. 10 JUNE, p 9
Eyecatchers in Milan—seen at EEMU 12. 4 NOV, p 11
Hydro-forming part 2—tooling systems. 8 JULY, p 27
Measuring machinability of free cutting steels
By Special Steels Division of BSC. 9 SEPT, p 9
No throwaways. 9 DEC, p 3
Pre-set tooling for presses. 9 DEC, p 41
The right reamer for the job
By Arnold Searle. 22 APR, p 33
UK carbide tool designs are compatible
By J Hargreaves, Wickman Wimet Ltd. 11-25 MAR, p 57

CUT-OFF MACHINES
Bi-metal bandsaws. 18 NOV, p 2
Cut-off saw designed to use tipped blades. 11-25 MAR, p 75
Rings—three at a time. 6 MAY, p 11

DRILLING
A new look at ultrasonic metal drilling
By Andrew Shoh, Vice-President, Research, Branson Sonic Power Co. 11-25 FEB, p 191
Alignment aid halves set-up time
By R W Brierley, West Midlands Low Cost Automation Centre. 11-25 MAR, p 65
Castings drilled easier. 11-25 FEB, p 176
Cylinder bores machined faster. 21 OCT, p 42
Czechs aim for export expansion at Brno. 21 OCT, p 25
Deep hole borer makes many parts in one pass. 11-25 FEB, p 199
Eyecatchers in Milan—seen at EEMU 12. 4 NOV, p 11
Four machines launched on UK market. 8 APR, p 35
High production rates from "tailored" borers. 22 JULY, p 17
Just dial in the dimension. 18 NOV, p 5
N-C borer reduces manufacturing times. 14 JAN, p 21
New from Japan. 8 JULY, p 4
Russian jig borers need no extras. 22 APR, p 41
Spotlight on the Czech machine tool industry
By F C Haydon. 24 JUNE, p 27
Versatile rocker arm machining. 21 SEPT, p 41

ELECTRICS & ELECTRONICS
Breakthrough leads to battery computers. 21 OCT, p 40
Continental motors. 9 SEPT, p 2
Electro-optics for on-line inspection
By George Lewis. 8 JULY, p 7
Thyristor control and PWB. 18 NOV, p 53

ELECTRO-CHEMICAL MACHINING
Effective product marking—an economic must
By Martin Cairns, 21 OCT, p 11
Production by electrolysis. 14 JAN, p 13

ELECTROFORMING
Electroforming cuts cost of complex shapes
By Dr S A Watson—International Nickel. 7 OCT, p 9

Index

continued

FERROUS METAL

Case-hardening steels. 21 OCT, p 3
Film stars steel. 4 NOV, p 4
Independent twin mill begins production. 24 JUNE, p 35
Measuring machinability of free cutting steels
By Special Steels Division of BSC. 9 SEPT, p 9
Metric steel. 9 DEC, p 3
Steel stockholder invests over £3m in service. 11-25 FEB, p 187
Switch to tube cuts costs. 18 NOV, p 55
Ultrasonics tests hot steel plates. 24 JUNE, p 36

FINISHING

Blast cleaning and phosphating carried out simultaneously. 21 SEPT, p 37
Deburring—the lost cause in engineering production. 9 DEC, p 19
Hot spray coating offers production advantages. 23 SEPT, p 9
Metal finishing on show. 9 DEC, p 4
Powder coating saves labour. 21 SEPT, p 43
Spray costs down in Holland. 19 AUG, p 37
There's more to paint spraying than a hand gun
By J A I Hunter, Technical Director, Binks-Bullows Ltd. 8 APR, p 7

FLUIDICS

Detecting and gauging using fluidics
By Derek Bailey, Electrosil Ltd. 6 MAY, p 7
Fluidics quadruples production. 7 OCT, p 41
Fluid logic improves efficiency. 8 JULY, p 38

FORGING

Can you save costs by cold-forging?
By Martin Cairns. 20 MAY, p 23
Costs cut by cold forming. 10 JUNE, p 26
Heating speeds forging. 6 MAY, p 31
Powder forging offers higher precision. 9 DEC, p 9
Steel controlled to ensure quality of engineers' tools. 11-25 MAR, p 39

FOUNDRY

Foundry installs auto-line. 10 JUNE, p 28
Magnetic "sand" simplifies casting. 18 NOV, p 57
Seen at the 1971 Foundry Exhibition.
By George Lewis. 8 JULY, p 21

GAS

Gas saves time and wire. 6 MAY, p 31
High efficiency gas reduces spraying and cutting costs. 11-25 FEB, p 219

GEAR MANUFACTURING

Biggest ever hobbed gear. 23 SEPT, p 2
Gear segment generation. 10 JUNE, p 4

GRINDING

Czechs aim for export expansion at Brno. 21 OCT, p 25
Diamond abrasive cuts costs. 24 JUNE, p 34
Diamond grinding of ceramics. 7 OCT, p 4
Eyecatchers in Milan—seen at EEMU 12. 4 NOV, p 11
Four machines launched on UK market. 8 APR, p 35
Precision auto loading. 7 OCT, p 37
Robot feeds internal grinder. 21 SEPT, p 38
Swing-away wheel dresser extends jig-grinding. 11-25 MAR, p 32
What sort of machine for diamond grinding?
By Dr Ing D M Busch of De Beers Diamond Research Laboratory, Johannesburg. 20 MAY, p 9

HANDLING & STORAGE

Air gives a lift to production. 11-25 FEB, p 155
Applied ultrasonics. 4 NOV, p 3
Billet stacking raises productivity. 18 NOV, p 61
Dual duty conveyors boost car transmission assembly. 18 JULY, p 35
Good handling means more output. 11-25 MAR, p 77
How to be small and successful. 7 OCT, p 29
Maxi stores small parts. 14 JAN, p 41
New style conveyor system—by compressed air. 19 AUG, p 38
Robot feeds internal grinder. 21 SEPT, p 38
"Safe" linear travel offered. 9 DEC, p 35
Self-storing conveyor. 10 JUNE, p 25
Solving handling problems. 9 SEPT, p 2
Steel stockholder invests over £3m in service. 11-25 FEB, p 187
Swedish robot. 4 NOV, p 3
What's best—D-I-Y or outside specialists? 11-25 FEB, p 213

HEAT TREATMENT

Heating speeds forging. 6 MAY, p 31
Magnetic heating technique arrives from US. 7 OCT, p 33

HONING & LAPPING

Electrode firm does its own refurbishing. 21 SEPT, p 44
Fast machining by lapping. 4 NOV, p 41
Honing machines on show. 24 JUNE, p 36
On-site honing. 19 AUG, p 2

HYDRAULICS

Filters afford maximum protection. 19 AUG, p 36
Here is a formula for success. 11-25 FEB, p 161

INSPECTION

Auto gauging cuts rejects. 20 MAY, p 43
Automatic checking of casting accuracy. 22 APR, p 41
Automatic cylinder gauging. 20 MAY, p 44
Coal blending can cut heating costs. 11-25 MAR, p 32
Conference looks at on-line inspection
By George Lewis. 19 AUG, p 29
Detecting and gauging using fluidics
By Derek Bailey, Electrosil Ltd. 6 APR, p 7
Door detects metal objects. 1-25 FEB, p 163
Electro-optics for on-line inspection. 8 JULY, p 7
Eye-catchers in Milan—seen at EEMU 12. 4 NOV, p 11
Gas leak testing. 18 NOV, p 3
Gauging of engine crankshafts. 6 MAY, p 36
Gauging system halves reject rate. 21 SEPT, p 40
Inspection machines—what do they offer? 7 OCT, p 17
Inspex points the way to future trends
By George Lewis. 4 NOV, p 35
Meeting the demand for higher quality
By Alexander Crawford, managing editor of Non-Destructing Testing. 4 NOV, p 19
NC slashes time for cam profile inspection. 21 OCT, p 38
Odd flute measuring device. 14 JAN, p 26
Optical-electron microscope price gap closed. 11-25 FEB, p 207
Profit control through quality control. 22 APR, p 13
Profitable weighing
By B R Sims, BSc, Hunting Engineering Ltd. 11-25 MAR, p 61
Quality control underwrites diamond grit production. 22 APR, p 47
Steel controlled to ensure quality of engineer's tools. 11-25 MAR, p 39
Testing centre. 22 JULY, p 3
Testing 100 times faster. 18 NOV, p 3
The role of NDT in quality. 11-25 MAR, p 11
Three minutes flat. 8 JULY, p 3
Ultrasonics tests hot steel plates. 24 JUNE, p 36

JIGS & FIXTURES

Add-on extras can boost machine productivity. 8 APR, p 17
Alignment aid halves set-up time
By R W Brierley, West Midlands Low Cost Automation Centre. 11-25 MAR, p 65
Big cost savings through tooling plate. 4 NOV, p 39
Fluid logic improves efficiency. 8 JULY, p 38

LASERS

Lasers will get cheaper and more powerful. 8 APR, p 23
Plascut pioneers Europe's first laser cutting service. 9 DEC, p 33

LUBRICATION

Automatic lubrication—good insurance. 9 SEPT, p 34
Lubricant research. 18 NOV, p 3
Reduced rates. 21 OCT, p 3

MACHINE INSTALLATION

Machine tool erection and assembly—Pt 2. 14 JAN, p 30
Continued from page 1640, 17 DEC
By H. C. Town, MIMech.E, MIPE, FRSA

MACHINE TOOL INDUSTRY

Czechs aim for export expansion at Brno. 21 OCT, p 25
EEMU 12 gives way to Euro-World. 4 NOV, p 9
Italy offers the world sophisticated machines
By Tony Philpott. 22 JULY, p 33
Machine tool chiefs warn British industry. 9 DEC, p 2
Machine tools in South Africa
By W L Speight, South African Correspondent. 9 SEPT, p 29
Metre made from Imperial machines for years to come. 18 NOV, p 2
Milan exhibition highlights Italy's machine tool strength
By Dr Ing. Carlo Prono, Direttore di Rivista di Meccanica & di Ingegneria Meccanica, Milan. 14 JAN, p 35
One big moan—but are they doing that badly? 4 NOV, p 2
Pay as you earn. 4 NOV, p 4
Poles seek bigger share of UK machine market
By Robin Bloor, Deputy Editor, reporting from Warsaw. 22 APR, p 7
Spotlight on the Czech machine tool industry. 24 JUNE, p 27
The gloom continues
By F C Hayden. 8 JULY, p 2
When do low prices constitute dumping? 21 OCT, p 27

MACHINING CENTRES

Czechs aim for export expansion at Brno. 21 OCT, p 25
Spotlight on the Czech machine tool industry. 24 JUNE, p 27

MANAGEMENT

An all-round look at group technology
By Richard Ward, Chief of Manufacturing Systems, ICL. 21 OCT, p 31
Better information can increase productivity

Index

continued

By Andrew Kirk—Technical Director of Computers in Commerce Ltd. 9 SEPT, p 17
Coding systems offer savings across the board
By N B Kirkpatrick & S W Averall of Harriman, Green & Associates. 6 MAY, p 17
Company aircraft pay for themselves. 9 SEPT, p 2
Effective purchasing can boost profits
By Dr Brian Weaving, Senior Consultant. 9 DEC, p 27
How management can get the best from their staff. 11-25 FEB, p 224
Inventory costs—can they be measured?
By Andrew Kirk, Technical Director of Computers in Commerce Group Ltd. 8 JULY, p 13
Language managers understand. 10 JUNE, p 2
Machine shop metrication—first hand experience
By Eric Whiteley, Whiteley Lang & Neill. 18 NOV, p 37
Managers—back to basics to cut costs
By F J Hull, Associated Industrial Consultants. 10 JUNE, p 17
Metrication planning for the machine shop
By The Metrication Board. 18 NOV, p 29
Pay as you earn. 4 NOV, p 4
Production changeover—one man's view.
By Michael Lucas, Manufacturing Director, Sifam Electrical Instruments Co Ltd. 18 NOV, p 21
Production starts at the drawing board
By G A Bayley, CEng. 11-21 MAR, p 25
Profit control through quality control. 22 APR, p 13
Realities of communication
By Clifford Rhodes. 11-25 MAR, p 51
Spin-off under magnifying glass. 21 OCT, p 2
Take a close look at wage structures
By William Hird, Associated Industrial Consultants. 18 NOV, p 43
That Bill and the production engineer
By Ewan Mitchell—MP, QC. 19 AUG, p 23
What pressures affect wage claims?
By William Hird, Manager for Industrial & Human Relations with Associated Industrial Consultants. 4 NOV, p 29

MARKING

Effective product marking—an economic must
By Martn Cairns, 21 OCT, p 11

METRICATION

Machine shop metrication—first hand experience
By Eric Whiteley, Whiteley Lang & Neill. 18 NOV, p 37
Metrication planning for the machine shop
By the Metrication Board. 18 NOV, p 29

MILLING

Continuous path milling reduces machining costs. 9 DEC, p 39
Eye-catchers in Milan—seen at EEMU 12. 4 NOV, p 11
Four machines launched on UK market. 8 APR, p 35
Machine for profile rollers take the biscuit. 11-25 MAR, p 69
Machine for large parts makes debut. 10 JUNE, p 29
More a system than a machine. 11-25 FEB, p 175
NC machine bridges gap. 6 MAY, p 35
NC machine does work of three. 9 DEC, p 37
Poles seek bigger share of UK machine market
By Robin Bloor, Deputy Editor, reporting from Warsaw. 22 APR, p 7
Turret mill for heavy duty market. 4 NOV, p 40

NON-FERROUS METALS

Big cost savings through tooling plate. 4 NOV, p 39
Continuous cast brass. 4 NOV, p 5

NUMERICAL CONTROL

Biennial wage review may boost NC sales
By K Snowden, Qualters & Smith Bros Ltd. 19 AUG, p 13
Continuous path milling reduces machining costs. 9 DEC, p 39
Control tape on the warpath. 7 OCT, p 5
Control systems—what is their scope?
By Arnold Searle. 20 MAY, p 17
Low cost position controller. 24 JUNE, p 35
Marwin 'hustles' for lathe market. 18 NOV, p 49
NC breaks into the woodworking industry. 8 JULY, p 3
NC cuts down-time to 5 per cent. 21 SEPT, p 42
NC jig borer reduces manufacturing times. 14 JAN, p 21
NC machine bridges gap. 6 MAY, p 35
NC machine does work of three. 9 DEC, p 37
NC paves the way for computerised plant. 6 MAY, p 25
NC service offers expansion without investment. 9 SEPT, p 33
NC slashes time for cam profile inspection. 21 OCT, p 38
NC sub-contractor sets up shop in Wales. 11-25 MAR, p 123
Turret presses and NC—the perfect match. 22 APR, p 27
US NC controls made in UK. 9 SEPT, p 4
Useful techniques from the MCFM01 post processor
By J Robinson, Computer Systems Designer. 11-25 FEB, p 167

PLANING & SHAPING

UK first for Wales. 14 JAN, p 40

PLASTICS & RUBBER MATERIALS

New cast plastics for low cost production. 20 MAY, p 41
Printed gaskets eliminate 'O' ring grooves. 21 OCT, p 37

PLASTICS & RUBBER PRODUCTION

Cooler coolant water speeds extrusion. 7 OCT, p 35
From granules to plastics sheet. 23 SEPT, p 3
Landscape moulding—three dimensions in one. 8 JULY, p 37
Mould design for plastics injection moulding
By Martin Cairns. 19 AUG, p 7
Moulding reduces cover costs. 9 AUG, p 37
New design cuts machining time. 7 OCT, p 39
Plastics in small batches can show big savings
By Robin Bloor. 9 SEPT, p 23
Small moulders fill gap. 19 AUG, p 34
What about plastics? 10 JUNE, p 23

PNEUMATICS

Air gives a lift to production. 11-25 FEB, p 155
Air helps 600 per cent production increase. 14 JAN, p 45
Industrial compressors—how do you choose?
By Martin Cairns. 22 JULY, p 11
Low cost positioning. 8 JULY, p 39
Pneumatics in the press shop. 19 AUG, p 35
Screws put the pressure on production engineers. 6 MAY, p 13

POWER TRANSMISSION

No lubrication drive. 11-25 MAR, p 20

PRESSING & SHEARING

Fine blanking on a standard press. 11/25 FEB, p 208
Four machines launched on UK market. 8 APR, p 35
Hydro-forming—what savings does it offer?
By Obering Hans Pischel of SMG, Weisental W Germany. 24 JUNE, p 9
Hydro-forming part 2—tooling systems. 8 JULY, p 27
Impact or squeeze from one press. 11-25 MAR, p 75
Instant production follows £200 000 investment. 19 AUG, p 33
More scope for punching. 21 OCT, p 39
Pneumatics in the press shop. 19 AUG, p 35
Pre-set tooling for presses. 9 DEC, p 41
Problems of cold forging can be overcome with hydraulic presses. 11-25 MAR, p 19
Straightening press. 9 SEPT, p 3
Turret presses and NC—the perfect match. 22 APR, p 27
Two lathes unveiled at Birmingham
By Robin Bloor. 20 MAY, p 35
US turret presses to be made in UK. 14 JAN, p 39
Working with Vinyl-metal
By P L Furminger, Research & Development Manager, Huntley, Boorne & Stevens Ltd. 11-25 MAR, p 35

PRODUCTION CONTROL

Air helps 600 per cent production increase. 14 JAN, p 45
An all-round look at group technology. 21 OCT, p 31
Better information can increase productivity
By Andrew Kirk—Technical Director, Computers in Commerce Ltd. 9 SEPT, p 17
Bottlenecks eased by planning system. 18 NOV, p 53
Coding systems offer savings across the board
By N B Kirkpatrick & S W Averall of Harriman, Green & Associates. 6 MAY, p 17
Computer aids production. 9 SEPT, p 38
Controlling the cost of production control
By Brian Burtt, Associated Industrial Consultants. 7 OCT, p 23
Does your production control come up to scratch? 11-25 APR, p 41
Inventory costs—can they be measured?
By Andrew Kirk, Technical Director of Computers in Commerce Group Ltd. 8 JULY, p 13
Language managers understand. 10 JUNE, p 2
Machine shop metrication—first hand experience
By Eric Whiteley, Whiteley Lang & Neill. 18 NOV, p 37
Metrication planning for the machine shop
By The Metrication Board. 18 NOV, p 29
Production changeover—one man's view
By Michael Lucas, Manufacturing Director, Sifam Electrical Instruments Co Ltd. 18 NOV, p 21
Production control using the cost effective system
By Brian Burtt, Associated Industrial Consultants. 23 SEPT, p 17
Production starts at the drawing board
By G A Bayley, CEng. 11-25 MAR, p 25
Screws put the pressure on production engineers. 6 MAY, p 13
Understanding stock control. 6 MAY, p 4
What's new in shop floor computers?
By Andrew Kirk, Director of Computers in Commerce Group Ltd. 24 JUNE, p 23

PROFILING

If it can be drawn—it can be photofabricated
By Harry M Robinson, Photofabrication Ltd. 11-25 MAR, p 45

Index

continued

Machine for profile roller takes the biscuit. 11-25 MAR, p 69

RECLAMATION

Hot spray coating offers production advantages
By Tony Philpott. 23 SEPT, p 9
Oil reclamation. 19 AUG, p 3
Saving over-machined parts. 10 JUNE, p 3

ROLLING

Long tube production gets boost. 22 JULY, p 22
Roll-forming. 9 SEPT, p 3

SAFETY ENVIRONMENT

Floors at half the price. 10 JUNE, p 27
Foaming fights fire. 6 MAY, p 3
How well is your factory lit? 22 JULY, p 5
Keep injuries down to a minimum. 11-25 FEB, p 221
2000 accidents. 18 NOV, p 3

SINTERING

Bigger sintered components. 23 SEPT, p 3
Powder forging offers higher precision. 9 DEC, p 9
US prize winner. 22 JULY, p 2

SPARK EROSION

Electrode firm does its own furbishing. 21 SEPT, p 45
Giant EDM machine for Japan. 24 JUNE, p 2

TRAINING

Don't cut training too much. 9 SEPT, p 4
NC training breaks new ground. 10 JUNE, p 4
Simulator improves maintenance training
By Julian Moore. 20 MAY, p 29

TURNING & THREADING

Add-on extras boost productivity. 20 MAY, p 48
Auto handling ups lathe output. 22 JULY, p 19
Automatic multi-pass copying. 9 SEPT, p 39
Automation—the role of DRO on centre lathes
By Julian Moore. 19 AUG, p 17
Fluidics quadruples production. 7 OCT, p 41
Hot turning ten times faster. 20 MAY, p 4
Marwin "hustles" for lathe market. 18 NOV, p 49
Poles seek bigger share of UK machine market
By Robin Bloor, Deputy Editor, reporting from Warsaw. 22 APR, p 7
Special case becomes new machine tool range. 11-25 MAR, p 71
Spotlight on the Czech machine tool industry
By F C Haydon. 24 JUNE, p 27
Survey shows bar feeder lifts output by 50 per cent. 8 APR, p 25
Two lathes unveiled at Birmingham
By Robin Bloor. 25 MAY, p 35

ULTRASONICS

A new look at ultrasonic metal drilling
By Andrew Shoh, Vice President, Research, Branson Sonic Power Co. 11-25 FEB, p 191
Applied ultrasonics. 4 NOV, p 3
Complex cavities produced by ultrasound. 8 APR, p 31
Meeting the demand for higher quality
By Alexander Crawford, Managing Editor, Non-Destructing Testing. 4 NOV, p 19
Take a look at ultrasound. 21 OCT, p 4
Testing centre. 22 JULY, p 3
Ultrasonics automated. 18 NOV, p 61
Ultrasonic degreasing system. 21 SEPT, p 39
Ultrasonics tests hot steel plates . . . cleans valve parts. 24 JUNE, p 36-37

WELDING & CUTTING

Adaptive control for friction welder, 24 JUNE, p 4
Automatic welding. 21 OCT, p 3
Beams welded from strip. 20 MAY, p 45
Gas saves time and wire. 6 MAY, p 31
HF process for butt welding. 20 MAY, p 49
High efficiency gas reduces spraying and cutting costs. 11-25 FEB, p 219
High voltage electron beam welding. 11-25 MAR p 8
How to assess the cost of welding
By John Doherty, Principal Scientific Officer, The Welding Institute. 18 NOV, p 15
Plascut pioneers Europe's first laser cutting service. 9 DEC, p 33
Square wave tube welder for dc speeds at ac costs. 24 JUNE, p 33
Spot welding proves doubters wrong. 19 AUG, p 37
The price of MIG welding. 11-25 MAR, p 7
The role on NDT in quality. 11-25 MAR, p 11
Wages systems in welding. 11-25 MAR, p 12
Water injection improves plasma cutting. 19 AUG, p 4
Welding engineers gather together in London. 11-25 MAR, p 7
Welding engineers get-together. 11-25 MAR, p 11
Welding for moving homes. 14 JAN, p 22
Welding in shipbuilding. 11-25 MAR, p 8
Welding—which process should you use?
By Julian Moore. 18 NOV, p 7

WORK STUDY

Work study bona fides confirmed. 6 MAY, p 2

DOWN WITH INSTALLATION COSTS

Fabcel Machine Mounting Pads eliminate the need for foundation bolts, lag screws, adhesive or grout. They stop vibration, reduce noise and absorb shock too!

Unique square cell design of Fabcel Pads makes positive bond between machine and floor. Pads available in three types for loads from 10 to 300 p.s.i. Used with all types of machinery from punch presses to industrial cameras.

FABCEL

Division of **Fabreeka** Products Co.,
High Street, Chasetown, Walsall, WS7 8XR.
Telephone Burntwood 2354/5.
Factories in United States and Canada

For uneven floors ... Fabcel Lev-L Mounts have a load range from 250 lb. each to 2 ton each.

Also FABREEKA mounts and components for heavy machinery, highly engineered and customised applications.
